Where Do You Mount Power in Rack?What Is The Difference Between A Surge Protector and A Power Strip?Where Should You Not Place A Power Strip?How Do You Stick A Power Strip to The Wall Without Drilling?Where Should PDU Go in Rack?Should Power Conditioner Go at Top of Rack?In terms of placement within a rack, it is recommended to place the power conditioner two spaces up from the top of the power amp. This allows room for the amp to breathe and for the AC cables to lay on top of the amp. Additionally, the tuner should be placed on top and the power amp at the bottom.See more on findthisbest 9.8/10Author: Alan EatonBrand: Startech Published: Nov 29, 2020Server TechnologyRack Mount Power Strips - ServertechServer Technology carries a full line of rack mount power strips that allow you to feed AC or DC power to your data center equipment cabinets or remote ...
