

When it comes to selecting an enclosure, it's important to be able to provide your white tree frog with space it needs, along with optimal temperature and humidity to ensure that it remains ...

All enclosures are half an inch smaller on the inside for the length, width, and height. For example, the 36" x 18" x 18" enclosure is 35.5" x 17.5" x 17.5" on the inside.

It is always difficult to know exactly how big that enclosure or cage should be. The table below was made in order to assist people when deciding on these measurements. The table will help ...

uromastyx enclosure size? I'm looking at getting a uromastyx and am looking to put it in a 30-gallon tank with uvb and heat lamps. What does a typical setup look like? How do you keep ...

If you've purchased an enclosure since June 2023 here are few updates: The 33 gallon enclosures no longer come with mounting bars in the lid. The 33 gallon enclosures have a slot ...

A reptile tank and enclosure isn't just a place to live; it's your pet's entire world. The right setup helps regulate temperature, supports enrichment, and gives your reptile space to move, climb, ...

Definition: This calculator converts tank dimensions (in inches) to volume in gallons for both rectangular and cylindrical tanks. Purpose: It helps determine the liquid capacity of tanks used ...

Crested geckos require arboreal tanks, not fish tanks. You'll need a vertical enclosure, measuring at least 18x18x24", which is a 33.7 gallon equivalent. Smaller "grow out" enclosures are ...

I've seen a lot of discussion regarding the size of a corn snake enclosure and because I wanted to know more I decided to ask the question here. I have a 4.5 month old corn snake who weighs ...

A juvenile corn or milk would do great and grow up in 20 gallon enclosure. If they're really young a ten. Make sure to get a secure enclosure or else your snake is going to escape. An adult corn ...
