

I recommend making a "warehouse" to store all your teleportable stuff at and just bringing your base with you. Obviously if you like a big base this is time consuming but there are several ...

you will need SOLID storage to hold the raw ore needed by your refined metal module. once built, assign some miners and trading ships to your station and watch the profits roll in!

One of the vehicle assembly areas allows for Battle Tanks and Super Heavy Tank assembly. It was behind tech on the server but my guess is that you'll need to build those exclusively at the ...

9. Add a bead of caulking around each hole to protect it from water. Resources: A custom metal railing can be purchased from a welding shop. Mark recommended using one with solid steel posts.

Eave and wall mounts are great for attaching your weather station to the side of a structure. When using a wall mount, make sure it extends far enough out to avoid interference ...

Thus, I didn't need to build own loaders, and this one station at an early stage completely paid back expenses on my fleet from salary to salary to crews. In the station settings, do not forget ...

Step 5: Build a Smithy Once you've got metal ingots, your next step is the Smithy. This crafting station unlocks at level 20 and requires the following materials: 5x Metal Ingots 20x Wood 50x ...

It allows you to experience the real-life modern building as well, including customized loot based on building type and possibly taking over a building to make a base, and defend yourself from ...

Here I show how to install metal pegboard (Link below) to a wall for my miter saw station build. Hanging this pegboard is pretty easy and is a great additio...

Well if you plan on having hulls in argon prime I would suggest to setup the refined metal there too and upgrade the station to hull parts since refined metal is a raw material for hull parts.

I click disassemble, I have a screw driver and a hammer. It's one of the keycard doors. But as soon as I click disassemble it acts like I just tried to open it, not destroy it. This is ...
