An index card (record card in British English and system card in Australian English) consists of card stock (heavy paper) cut to a standard size, used for recording and storing small amounts of discrete data. A collection of such cards either serves as, or aids the creation of, an index for expedited lookup of information (such as a library catalog or a back-of-the-book index). This system i...

The index card was a turning point, Foucault believed, in the relationship between power and technology. Like the categories they cataloged, Linnaeus's paper slips belong to the history of ...
